

A Civil Discourse Program for Elementary Students

A Free Visit for Your Elementary Classroom

Confident handshakes, clear voices, and kind words, brought right to your classroom.

HELLO, TEACHERS!

Big skills start small.

Think&Speak! is an interactive workshop program for elementary students. They build skills to listen to their peers, to speak with grace and kindness, and to speak with confidence, through fun, age-appropriate games and activities.

"Civil discourse means talking and listening in a kind and respectful way, **even when we don't agree.**"

How we explain it to students.

It sounds simple, but as we see in real life, it can be difficult. So we start building the skills now that help students become civil discourse leaders when they grow up.

The four fundamentals

The Confident Handshake

A firm grip, eye contact, and "nice to meet you." A confident first impression sets the tone.

Eye Contact & a Clear Voice

Eyes show you are listening. A clear, bold voice shows confidence.

Posture & Body Language

Sitting and standing tall shows confidence and respect for the speaker.

Respectful Disagreement

"I understand your idea, but I see it differently." We can disagree without being unkind.

We come to you: activities, games, and a craft

- 1 Warm-up and introductions.** Fun-fact icebreakers, then every student practices a real confident handshake.
- 2 Skill games.** Interview-and-introduce a partner, spot-the-confident-speaker, and answering questions with one great detail.
- 3 Kind-words practice.** Superhero speaker phrases like "Can I share my opinion?" and "That's an interesting idea."
- 4 A take-home craft.** Students make their own keepsake, like a laminated "I am a kind speaker" bookmark.

WHO'S BEHIND IT

Meet Zamina

Zamina Singh

Founder, Come to the Table Project

Junior, Santa Catalina School, Monterey

Zamina founded Come to the Table Project because she believes in a better path to a brighter future. She is active in Mock Trial, Varsity Tennis, and Varsity Swim, is CPR certified, and teaches sailing and tennis to children of all ages. When she grows up, she would like a career in law and public policy in Washington DC.

Come to the Table Project empowers students with tools for civil discourse. We believe we need an exit strategy from today's polarization: dignity and mutual understanding, and eliminating "us vs. them."

BRING IT TO YOUR CLASS

Booking is one email away

Tell us your grade level and a few dates that work. Zamina brings the games, activities, and craft materials to your classroom.
